ENDODONTICS

You Are Capable of Saving “Unsaveable” Teeth

Dr. Sonia Chopra encourages all of us to open ourselves up to new beliefs about which teeth can be saved. Using real stories from her own practice, she explores some of the biggest and most common dental beliefs about “unsavable” teeth.

Common Sense Insights Into Present Day Endodontic Instrumentation Techniques

Dr. Barry L. Musikant discusses the impact of the precautions necessary to maintain the integrity of the rotary NiTi instruments and offers alternative methods of instrumentation. These precautionary steps give the dentist the freedom to more thoroughly cleanse the canals rapidly, three-dimensionally, and without distortion.

ORAL SURGERY

The Reality of Surgical Extractions in General Dental Practice

Drs. Karl Koerner and Charles Miller discuss how, despite some situations requiring specialists, there are other situations where general dentists can routinely perform moderately difficult dental extractions. This article is peer-reviewed and available for 2 hours of CE credit.

RESTORATIVE

An Interdisciplinary Approach to the Treatment of Amelogenesis Imperfecta: A Case Report

Drs. Adam Goldberg, Mohammed S. Murayshed, Howard Drew, and Alexander Drew detail a case of a young patient with multiple restorative needs due to the underlying condition of weakened enamel. With collaboration, the results of this difficult case had a positive impact on the patient’s social, functional, and aesthetic well-being.

AESTHETICS

Demystifying Computer-Assisted Design

Dr. Joyce Bassett outlines the steps necessary to digitally take a case from data collection through design using in-house CAD software. She also demonstrates the steps to perform a chairside evaluation of a digital mockup and how to make any needed corrections to give the patient a predictable outcome.

Long-term, Provisional, 3D Printed Restorations as Part of a

Complex Treatment Plan

Drs. Rick Ferguson and Gregori M. Kurtzman present a case illustrating complex treatment involving orthodontics to better position the teeth and placement of 3D printed long-term provisionals in preparation for implant placement.

ALSO IN THIS ISSUE

TECHNOLOGY & INNOVATIONS

offer the latest research from the labs and R&D centers of companies around the United States and the world.

QUICK TECHNIQUE

tells an abbreviated story of the techniques and products of today’s dental practice.

NEWS & TRENDS

highlights the latest in current affairs of interest to dental caregivers, including new legislation, news from state dental organizations, and national health trends.

FOCUS ON

covers trends and hot topics in dentistry of direct relevance to clinicians and their practices.

VIEWPOINT

shares expert opinions on developments in the dental industry and how they will affect dental practices now and in the future.

INDUSTRY NEWS

tracks trends in the dental manufacturing sector, such as mergers, acquisitions, corporate restructuring, and top-level managerial appointments.

BUYERS’ GUIDE:

3D Imaging/CBCT Systems

This section will cover some of the latest technology in 3D imaging and CBCT systems. Manufacturers will also have the opportunity to mention what makes their products unique.

PRODUCT FOCUS:

Aligners

This month, we will explore devices and products that aid in the alignment of teeth. It will enable manufacturers to highlight their products’ distinguishing features.

Readers’ Choice Top 25 Endodontic Products

Some of the best endodontic products in dentistry will be featured in this section. Manufacturers can discuss what makes their products stand out.
